

Sidereal drive gearbox — baseplate drilling template

SCALE 1:1 on US Letter. Print at 100% / Actual size — no page scaling, no fit-to-page.

5 holes Ø5 mm. Centre distances 67.5 mm (stages 1-3) and 120 mm (final). Total 2048:1.

Spacer envelope Ø10 shown dashed — hard max Ø13 before it fouls the neighbouring wheel at S2 and S3.

Shafts S0 and S1 sit under the 196 mm output wheel: keep them below 19 mm tall. No top plate on those two.

Dashed grey = gear tip circles for context (clipped). Baseplate itself is approx 246 x 299 mm — larger than this page.
